och complaint having been made as to the mann which our thoroughfares have been left since the neduct pipes have been faid—there being nothing but beating clouds of dust in fair weather, and puddles of and whenever it rains—the Mayor addressed Capt. Meigs on the subject, with a view to have the avenue and our ablic streets placed in as good condition as they were before being disturbed for this purpose. It appears that the reason assigned for the delay in this matter is that the stop-cocks have yet to be put in; and that would have rendered it necessary, had the streets been previouscleaned, that the process should have been repeated It is earnestly to be hoped that neither this nor any other cause may much longer operate to prolong the present sance. The following is the reply of Capt. Moigs to the communication of the Mayor :

November 4th, 1858. DEAR Siz: I referred your letter of the 30th ultimo to the assistant engineer in charge of the Washington division of the aqueduct, and now enclose a copy of his suport, stating that, in the event of further delay, he will, at the expense of the contractor, organize a force to restore the streets to their condition previous to the excavation of the pipe trenches.

Very propositivity, your absolute. Very respectfully, your obedient servant,

M. C. MEIGS, Capt. of Engineers, Chief Engineer Washington Aqueduct. Hop. James G. Berret, Mayor.

Office of the Washington Aquaduct, Georgetown, 2d day of November, 1858.

Dean Sin: Your communication concerning the con-tion of 6th street has been received, and the matter

clition of 8th street has been received, and the matter presed upon the contractors.

It is almost impossible to avoid some complaint about the condition of the streets under any circumstances, but particularly when this sort of work is done by contract.

The contractor will only do that kind of work with vigor and despatch that pays him well, and that of an altogether unprofitable nature is apt to lag.

I shall organize a force next week, unless the nuisances complained of are removed, for the purpose of doing so myself, yet it will be with great reluctance as Mr. Mctiafic has probably been the most energetic contractor we have had, and this step has not been taken with others.

It should be borne in mind that the necessary re-oper In gof the streets for the introduction of stops would have again thrown the streets into but condition had they been carefully cleaned. Yours, respectfully, Signed)

Captain M. C. Meios, Chief Engineer Washington Aqueduct.

THE COLUMBIAN ASSOCIATION OF TRACHERS held its regu lar monthly meeting at the Smithsonian Institution yes terday forenoon. The weather being unfavorable, there was a thin attendance of the teachers of this District, and but little business was done. After some discussion on the subject of protracting instruments, the resolution alopted at the last meeting for the appointment of a committee on that subject was reconsidered, and, having been amended, was adopted in the following form:

Resolved. That a committee of five be appointed to examine and report to the association upon the absolute and relative merits of any protracting instruments which may be brought to their notice. The CHAIR appointed Messrs. S. L. Loomie, J. E. Thor

son, O. C. Wight, A. C. Richards, and R. B. Detrick as

Mr. Looms asked to be excused from serving on the committee; which was granted; and Mr. S. S. Kelley was appointed in his stead.

On motion, the association adjourned until Saturday next, at ter, o'clock, when the regular order of exerciin cloco ion, &c., will be proceeded with.

BONEAU'S PANORAMA. -- In consequence of the inclem ency of the weather during the post week, which has prevented many of our citizens from visiting the moving mirror of China and Australia, the proprietor announces that he will remain in this city one week longer. As work of art, this panorama is deserving of high praise, although it is liable to some criticism. Some of the figures are of giant proportions, and we are inclined to believe that the residences of the Chinese look better on canvas than in reality. As a whole, however, the manners and customs of that distant region are portrayed with considerable fidelity, affording an instructive and entertaining spectacle to the old as well as the young. The mechancal effects are superior to those of any panorama we have ver seen. The storm at sea, the moonlight view of the city of Melbourne, the burning of the European fac ories at Canton, and the closing salute of twenty-one guns, are all unsurpassed for truthfulness to unture, and make a vivid impression on the mind. We again recommend to all our readers to go to Odd Fellows' Hall and witness this exhibition.

A New Play. —To morrow night a new and original play will be presented at the Washington Theatre. It is termed "The Goldsmith of Padua," and was written by Mr. Thomas S. Donoho, of this city, a gentleman as well known for his literary abilities as for his eminent social qualities. The play is full of interest, and though wanting in those bloody and noisy scenes which detract so much from the stage literature of the present day, it ot fail to win the admiration of all who may see it. The beauties of the plot and the aptness of the language in which it is described, can be better realized by witness ing its representation than from the most impartial criticism that could be written. Great care will be taken in its arrangement, and the public may expect a triumph not only for the different actors who may take part in its performance, but for their gifted townsman, its author.

MUSICAL AND ELOCUTIONARY SOIRES. - The first of the monthly soirces given by Professor MacLeod for the gratification of his pupils and their friends took place on Friday evening. It was certainly a charming reunion , and, notwithstanding the inclemency of the evening, his commodious rooms presented a bright assemblage of youth and beauty. There was a great deal of delightful singing, with accompaniments of piano and harp; but the chief feature was a series of readings and recitations, executed by very young girls with a degree of correct ness, elegance, and animation seldom equalled by amateurs of the most mature years, and quite surpassing th elocution which we ordinarily hear at the public exhibitions of schools and colleges.

A juvenile class recited a dialogue in French, highly amusing, and by their perfect purity of tone reflected the highest credit on their faithful instructor, Professor Alexandre.

RELIGIOUS SERVICES TO-DAY .- Rev. Abiel Silver, of Wilmington, Del., will preach at the New Jerusalem church, on North Capitol street, between B and C streets, this forenoen at 11 o'clock.

Rev. E. M. Barger, formerly of Buffalo, N. Y., will be installed paster of the German Lutheran church, corner of Fourth and E streets, this forenoon at half-past ten clock, and will preach in the afternoon at three o'clock at the same place

Rev. Mr. Bassett is expected to preach in the Congregs tional church on Fifth street, opposite the City Hall, this afternoon at half-past three o'clock. The congregation of the church of the Ascension (Episcopul) occupy this

building each Sabbath morning and night, until the repairs on their own church shall be completed.

Removal.—The Mayor yesterday removed C. Arnoid, a day policeman, for intoxication, and improper conduct whilst in that state, and suspended a policeman named Norris for two weeks for absenting himself from duty and being where he ought not to have been. It is highly probable that the lawlessness which prevails in Baltimore are not held to a state of the fact that the policemen a great degree grows out of the fact that the policemen are not held to a state of the fact that the policemen are not held to a state of the successful sidder must enter into an obligation, with the early soft makes of the engineer, reserving ta entry per cont. We are glad that a different state of affairs exists in this city, and that the Mayor adheres rigidly to the performance of his duty.

THE "GREST RESCRIC" MOSTRIA. - Oaksmith & Company have announced in another column that they will issue in December next the first number of a new illustrated magazine under the above title. There can be no doubt, from the long list of brilliant suthers and writers who have been engaged to write for it, that its tone and general character will be of the highest order, and the who have been engaged to write for it, that its tone and general character will be of the highest order, and the general character will be of the highest order, and the publishers promise that "it will be thoroughly national—in no wise sectional or sectarian, and wholly impersonal."

Under these circumstances we can safely predict that this magnetic will supply a loose weak after the second of the second o magazine will supply a long needed want.
